Question 1

1 / 1 pts

Multicycle integer multipliers accumulate the partial products by iterating through each bit of the multiplier and if it is 1, adding the shifted multiplicand onto the accumulated value.

Answer 1:

Correct!

multiplier

multiplicand

Answer 2:

Correct!

multiplicand

multiplier

Question 2

1 / 1 pts

Restoring integer division may perform up to two ALU operations (add/sub) per bit position in the divisor.

Correct!

☒ True

☐ False

Question 3

1 / 1 pts

The IEEE754 **floating-point** standard represents significands with an implicit **leading 1**.

Answer 1:

explicit

Correct!

implicit

Question 4

1 / 1 pts

When performing floating-point arithmetic and rounding, the **guard bit** is an extra bit in the significand beyond the least-significant bit.

Answer 1:

most-significant

Correct!

least-significant
