This attempt took 22 minutes.

Question 1

1 / 1 pts

In the MIPS instruction set used in this course, the opcode field is the most-significant 6 bits of the encoded instruction.

Answer 1:

Correct!

most-significant

least-significant

middle

Answer 2:

2

4

Correct!

6

8

Question 2

1 / 1 pts

In the MIPS calling convention used in this course, registers \$s0-\$s7 are callee-saved and should be saved within the procedure .

Answer 1:

Correct!

callee-saved

caller-saved

Answer 2:

Correct!

should be saved within the procedure

should be saved prior to calling the procedure

Question 3

1 / 1 pts

Which of the following addressing modes are supported in the MIPS ISA? Select all that apply.

☐ Indirect

Correct!

☒ PC relative

Yes, branch instructions use PC relative addressing for the branch target.

☐ Autoupdate

Correct!

☒ Immediate

Yes, ALU instructions can specify one of their operands using an immediate value embedded in the instruction word.

Question 4

1 / 1 pts

A higher SPECratio implies better performance.

Correct!

☒ True

☐ False

Quiz Score: 4 out of 4
