

1 / 1 pts

Correct!

- ☒ True
- ☐ False

1 / 1 pts

During a **sw**, what values can **MemToReg** be?

☐ 1 - Data Read from Memory must be written to a register.

Correct!

☒ Don't Care - MemToReg doesn't affect the operation of sw.

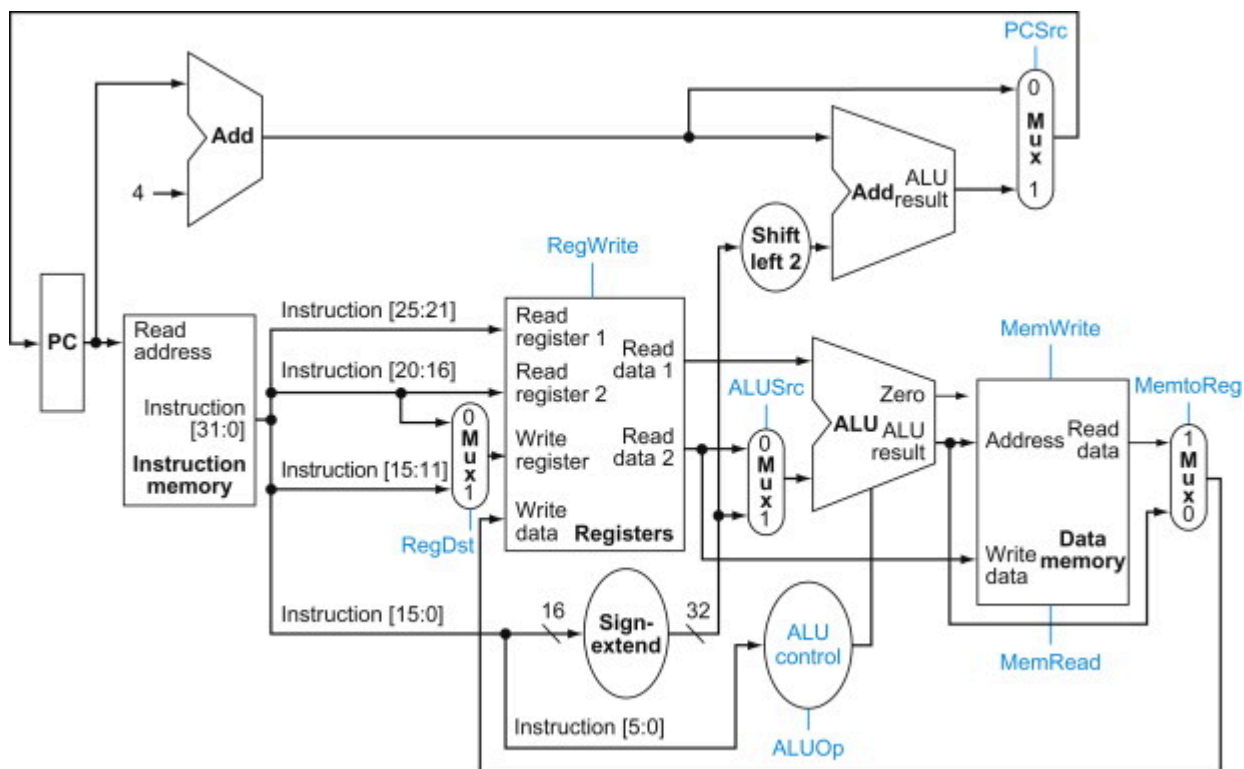

Store word writes data to Memory; Memory isn't read and nothing is written to the Register file, so MemToReg can be anything.

☐ 0 - The ALU Result must be written to the Register File.

Question 4

1 / 1 pts

RegDst is asserted (1'b1) for all **I-Format** instructions.

☐ True

Correct!

☒ False
